

DIGITAL HOMEOPATHY

Introduction

Imagine a world where people can literally "listen" their way back to health. For many years now we at the BRIT Team have been researching and putting into practice what has come to be called "digital homeopathy". This website makes a compelling case that digital homeopathy not only represents the future of homeopathy, but also the future of medicine.

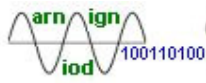

The field of homeopathy is currently under assault by the governments of many countries, funded by the drug companies, to eliminate the competition. Already **high potency remedies have been made illegal** in countries such as Germany and France, and similar attempts are under way in England and the United States. The fact is, the best way to ensure that homeopathy doesn't become extinct is to "go digital". Digital homeopathy has already been challenged in a court of law and won on the basis that therapeutic music such as Bach and Beethoven would also have to be made illegal.

Also consider that because of the potential for amalgams and root canals to interfere with an oral dose of homeopathy, listening to a remedy can sometimes be more effective. And if you need more reasons to "go digital", then perhaps you can free your mind to envision the possibilities for delivering remedies as sounds. For example, remedies can be sent via email and delivered on a computer, or an iPod!

And we certainly don't want to forget to mention the cost benefits of digital homeopathy. Once you have a remedy in digital form, you never have to purchase that remedy again. This strikes fear into the heart of drug companies and explains the reason for their panic.

Why Digital?

- Easy access to uncommon remedies
- Easy access to a wide range of potencies
- Traveling with homeopathy is no longer a hassle...no fear of the X-ray machines and you'll always have your remedies with you at all times (on your laptop)
- Flexible delivery methods that include email and telephone
- No ongoing costs
- Oral doses can be adversely affected by amalgams and root canals
- The only guarantee that homeopathy will survive the assault by drug companies and governments

What is Digital Homeopathy?

So what actually happens when a homeopathic remedy is swallowed? How and why does your body respond to homeopathy?

Before we get to "digital" homeopathy, let us first discuss the science behind how and why homeopathy is so very effective at addressing the cause of disease. As you will see, the science that proves homeopathy can be a powerful therapy has been around for over 100 years, but it has been the best kept secret of our modern times.

Background

Homeopathy was discovered and introduced in 1796 by Dr. Christian Friedrich Samuel Hahnemann (1755-1843), and over the past couple of decades it has become one of the fastest growing alternative modes of natural therapies. Homeopathy works off of the Law of Similars, which according to Hahnemann means let likes be treated by likes. A body's own healing capacity is initiated through the use of substances capable of arousing a similar condition in a healthy individual. When remedies are given based on this principle the body's healing responses are stimulated. For example, in the case of a fever, the allopathic approach would indicate suppressing the fever through anti-fever drugs. Homeopathy would administer a remedy that would *produce* fever in a healthy person. Homeopathy also boosts the immune system, increasing resistance.

Homeopathic remedies are made by an elaborate method known as Potentisation. This process involves diluting a substance, at times to such an extent that the solution probably might not contain even a single molecule of the original

substance (this is true for dilutions greater than 24D). Even though the remedy is diluted in such a vast amount, it still possesses the capability to affect a body because homeopathy actually works at the energetic level. Each homeopathic remedy (and its potency) has its own vibrational signature. When the remedy enters the body, its vibrations send out a precise set of frequency patterns like a radio broadcasting a song. If the body needs that remedy, there will be a resonant connection made with cells that are "tuned" to receive the remedy's "song". Once this resonant connection is made, the healing process begins (i.e., the remedy "begins working").

Consider how a pair of noise canceling headphones work. Homeopathic remedies can work on the same principles with the disease process, as the disease process is viewed as an energy field in the body and the homeopathic can be matched to that field in a way that would cancel the field out. This type of homeopathic would be considered a *pathic*, since the disease process and the remedy have similar or nearly the same energy patterns but the remedy is an inversion of the disease. Just like the headphones cancel vibrational noise patterns, the remedy cancels out the disease energy pattern. Another type of homeopathic is called a *tonic*, and have the same characteristics as the pathic except the remedy is not inverted and therefore amplifies the disease process energy. A tonic is used when the body has gone into homeostasis or a false balance with the disease and no longer recognizes the disease. A tonic will amplify the disease and allow the body to recognize that the disease is there and allow the body to use its sustentative energy to remove the disease.

Pathic remedies work like a pair of noise canceling headphones

Now you can understand how **homeopathy is energy medicine**.

Over 100 years of Scientific Research

Now that you have a basic level of understanding, you're ready for a more in-depth look into the science that proves homeopathy. And to do this, we want to refer you to a very comprehensive and thoroughly-researched book written by Dr. Savely Yurkovsky, MD. Dr. Yurkovsky's book provides all the information one needs to gain the knowledge required to understand the potential of homeopathy (i.e., digital medicine). With over 400 references to a wide range of research on the subject, he makes a very convincing case that homeopathy is real medicine and if used properly could change our healthcare system as we know it today and bring us far greater results at a fraction of the cost.

Digital Form

So what if you could capture a homeopathic remedy's vibrational signature to a sound file and play it back? Since we now know that homeopathy actually functions at the "energetic" level, then how would the body know the difference between an oral dose of a remedy and its replicated sound file? The answer is...it doesn't. It should make total sense to you why the body's response to digital homeopathy is exactly the same as that of a more traditional oral dose.

Research by Benveniste, recognized by many as the father of digital homeopathy, proved that it is possible to record the activity of a homeopathic remedy or substance on a computer, and then replay it on a biological system that is sensitive to that same remedy or substance. [Click here for much more information on the study of digital homeopathy](#).

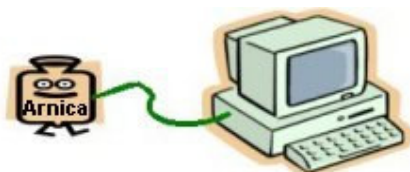

Does it actually work?

The short answer is...absolutely yes. The use of digital homeopathy in practice is not new. Many practitioners around the globe have been taking advantage of the digital form for many years. Companies that sell homeopathic remedies also sell CDs with digital versions of their remedies (Staufen Pharma is an example of this). The use of instruments such as EAV (Electro-Acupuncture), which can measure responses to homeopathy, have been used for many years to validate digital remedies. Our own clinic in Toronto, Canada has been using digital homeopathy exclusively for over 5 years. We have also done our own research using Heart Rate Variability to measure a person's response in real time to digital remedies.

Benveniste published much of his research and you can [read about many of his findings for yourself by clicking here](#).

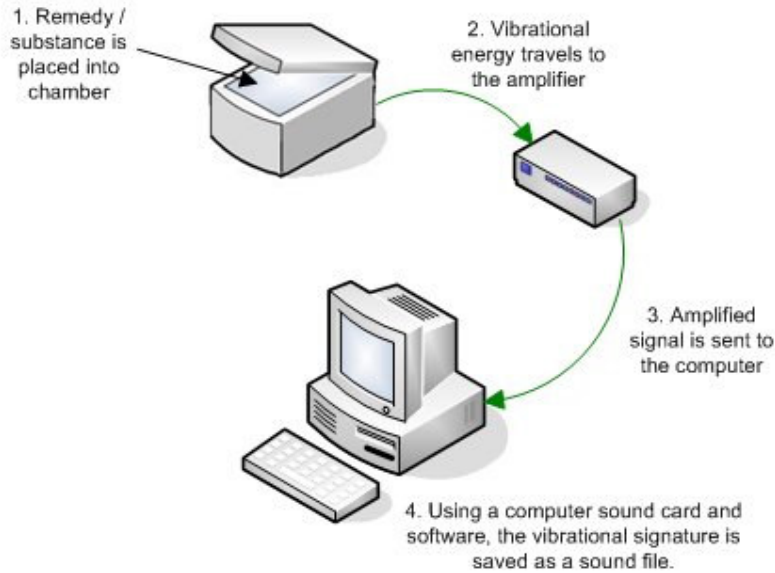

One caveat that needs mentioning has to do with the quality of the digitized form. Obviously the more accurate the digital remedy, the better the response. (For more on this, go to the section "*How are remedies digitized?*") There are companies selling digitized remedies that are not accurate digital signatures of the actual remedies, and you can expect the response to be inferior.

So here is something to think about...when you are first introduced to a new supplement, how do you know it works? Are you totally convinced a supplement is worthy based on product literature and publications that you read? Or do you have to try it over a period of time to develop the confidence for yourself? So why not evaluate digital homeopathy in the same manner? There is no downside, and the potential upside is really quite staggering.

How are remedies digitized?

The process of capturing the vibrational energy of a remedy (or any substance for that matter) and storing it on a computer as a sound file can be accomplished using some sort of chamber, an amplifier, a computer and software. Here is a diagram that helps illustrate the process:

Everything around you has its own precise vibrational signature. So whatever is placed into the chamber generates its own specific and unique frequency patterns. These frequency patterns are sent from the chamber to the amplifier. The amplifier boosts the analog signal that comes from the chamber and may also provide another level of filtering. From there the computer sound card converts the analog signal to digital. A software program is then used to capture the digital information to a standard sound file that can be played at any time.

Of course, this is somewhat oversimplifying the process. There are many variables that affect the quality/accuracy of the outcome, which is nothing more than digital information. For example, the amplifier could be integrated into the chamber. The chamber itself must be carefully designed to ensure that as much noise as possible is blocked and filtered from the capturing process. This can be tricky, as we are surrounded by environmental noise of all kinds (cell phone towers, 60Hz from lighting, computers, geopathic and magnetic energy from the earth, etc.) The quality of the sound card is a significant factor, and whether it is internal or external to the computer (the computer itself generates noise).

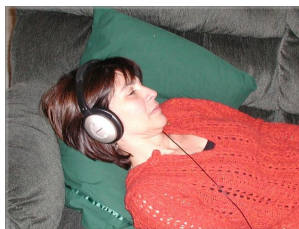

The goal is to capture as much of the vibrational information as possible of whatever is placed in the chamber with as little noise as possible. We at the BRIT Team have spent countless hours of research in the development of our capturing process, and we feel we have one of the most accurate capturing processes in the world. Click [here](#) for a detailed description of this research. We have a library of over 4,000 remedies and we continue to expand our library at a rapid pace. Using our [Synergy software system](#), this library of remedies is now available to anyone. We are now adding supplements to the library to serve as "digital test kits".

There are many companies out there that claim to have digital homeopathy, but beware. Before purchasing anything, be sure to ask how the remedies are digitized. The answer you get will tell you whether to do business with that company or not.

How is it delivered?

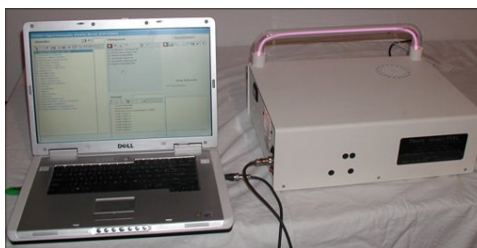

Once a remedy has been captured as a digital sound file, there are many methods for delivering the "information". The easiest method is to **listen to the sound with a pair of headphones** for a few minutes. The digital remedy can be copied to an **iPOD or PDA** (Personal Digital Assistant), can easily be **emailed** across the globe, or even **played over the telephone** if necessary.

Using a bioresonance device connected to a computer, the sound file can be **"imprinted" into a bottle of water**.

Other more elaborate methods for delivering the digital remedy include using **a resonant light or even a laser**.

Keep in mind that homeopathy is very "subtle" energy, and the rule that "less is best" is applicable. If the remedy is in fact one that is needed by the body, a resonant connection between the remedy's digital information and the body's own digital information is made instantaneously, and consequently just a few minutes of delivery is adequate.

As was mentioned in the introduction, the effectiveness of homeopathy that is delivered orally can be greatly diminished by dental problems such as amalgams and root canals. The use of digital homeopathy overcomes these potential problems, and offers many more options to quickly and efficiently deliver remedies, even from thousands of miles away.

What are its applications?

Homeopathy

The use of digital remedies does not have to change how a classical homeopath practices. In fact, the remedy can be imprinted to a bottle of water and then delivered via drops. Digital can only enhance the life of a homeopath by providing additional options to deliver the remedy and eliminating ongoing costs. And in urgent situations remedies can be delivered over the telephone or via email. In addition, access to uncommon or rarely used remedies is not a problem because the digital library would have a very comprehensive and complete set of remedies (that is, if you have our own [Synergy digital homeopathy](#)).

Validating Supplements

Digital sound files can be captured for supplements, herbs, etc., as well as homeopathic remedies. Then these sound files can be used to validate whether a certain supplement will be beneficial or not. This is done by playing the sound file of a particular supplement and using one of several methods (muscle testing, Nogier pulse testing, EAV) to test the response. This is important, as it provides a method for ensuring that the body isn't burdened with unnecessary

supplementation. And best of all, it is not necessary to have the actual supplement on hand, thus eliminating the need to purchase "test kits". Our [Synergy system](#) includes what we call "digital test kits" for many product lines, and we continue to add more and more on a regular basis.

Disease Root-Cause Analysis

One of the most powerful applications of digital homeopathy is finding and analyzing the root cause of a disease, and the only system that provides this application is our [Synergy software](#). The breakthrough work of Dr. Schimmel and his Causal Chain has been integrated into Synergy along with all the digital remedies necessary to find the actual root cause of a disease. When Synergy is used along with EAV (Electro-Acupuncture by Voll), there is no better system to find and treat the root cause of a chronic illness or disease, especially when an emotional trauma is at the root of the problem.

Music Therapy

Music has been a form of therapy for thousands of years. Who hasn't had their mood changed with the sounds of a certain song or melody? The potential for integrating the sounds of digital remedies into music is very exciting and represents an opportunity to take music therapy to another level.
